15 Speciality EMR

EMR per Speciality

- Template for each speciality
- Procedure sets per speciality
- Dentist, Orthopaedic and others
- Vitals beside the doctor's notes

Specialist's Choice

- Drag-and-drop EMR designer
- Change it any time, no coding
- 13 field types to pick from
- Drawing, image and file fields

ICD-10 Coding

- ICD-10 code with the diagnosis
- Global disease classification
- Saved with each visit record
- Placed in any EMR template

Digital Prescription

- Medicine, frequency and timing
- Investigation search
- Refer to another specialist
- Follow-up date with reminders

Tele-Consultation

video visit, same EMR as the clinic

- Walk-in or Video chosen at booking
- Video room created on full payment
- Separate doctor and patient links
- Links sent by Email and WhatsApp
- Configurable grace time
- Re-trigger a failed room
- No app for the patient to install
- Skips the walk-in token queue
- Listed on the doctor dashboard
- Notes in the same EMR
- Visit saved as Video consultation
- Prescription by Email

Appointments & Roster

- Doctor schedules and rosters
- Slot-wise availability
- Doctor room assignment
- Doctor's own roster view
- Consulting fee per doctor
- Speciality, sub-speciality masters
- Upcoming visit on patient portal

Booking & Billing

- Registration with validity days
- Search by phone, code or name
- Last visit shown at booking
- Services and consulting fees
- Discount approval
- Bill and money receipt printing
- Cancellation, refund, due collection

WhatsApp Integration

1. Bill PDF at booking
2. Video link to patient and doctor
3. Portal login details
4. Follow-up: 7 days and 1 day before
5. Certificate PDF
6. Editable message templates
7. Switched on per branch

Communication Channels

WhatsApp **Email** **SMS**
